eccorok™

Building upon CERATECH's successful ultra rapid infrastructure repair cement technology, **eccorok™** has been formulated to meet the unique requirements of the architectural surfaces and countertop professional.

COAL COMBUSTION PRODUCTS PARTNERSHIP

CERATECH's revolutionary cements are pozzolanic in nature, utilizing over 90% recycled coal ash and other sustainable components. The manufacturing process requires only simple blending of powders essentially producing zero CO²

Performance Characteristics:

- Will reach compressive strengths greater than *4,000 psi in 24 hours enabling safe de-molding and immediate polishing.
- 28 day strengths greater than *9,000 psi
- Can be used for wet cast and GFRC applications - Does not require zirconium infused glass fiber
- No ASR issues - allows for the use of glass and other reactive aggregates including recycled concrete.
- Can be integrally colored or stained
- Can be sprayed
- Exceptional replication of detail

* Strengths may vary depending upon mix design and types of aggregates used

* Available in 50 lb. bags, 2000 lb Super Saks and Bulk Containers.
